EDUCATION

Queen's University

Kingston, Ontario

Bachelor of Computing, Mathematics and Analytics; GPA: 4.0/4.3

Sept 2019 – Apr 2024 (Expected)

Relevant Coursework: Algorithms, Software Architecture, Database Management, Data Structures, Computer Architecture, Operating Systems

WORK EXPERIENCE

Automation Scripting Developer Coop

Ottawa, ON

Ericsson Canada Inc.

Sept 2022 – Current

- Created, developed, and maintained 10+ automated workflows using **Power Automate**, **Azure**, and **Python**. Generating 20+ error-free dashboards daily across departments, resulted in a 90% reduction in manual processes.
- Developed and implemented an automated email server that streamlined the license request process for an internal software tool, serving 200+ users. Created an automation flow that generates user reports quarterly.
- Developed an innovative web app using **JavaScript**, **CSS**, and **React**, featuring a cause-and-effect chain builder. Empowered users to visualize key drivers and outcomes, facilitating complex problem-solving for engineers.
- Conducted testing, debugging, and troubleshooting, ensuring the consistent and accurate performance of all tools.

Teaching Assistant

Kingston, ON

Queen's University

Sept 2021 – Current

- Instructed 150+ students on the Discrete Mathematics for Computing I (2021F), Data Structure (2022W) and Introduction to Computer Science II (2023S).
- Assessed student performance in assignments, quizzes, and exams, successfully addressing 200+ coding errors in **Python** and **Java** programs and providing feedback for improvement.
- Frequently responded to inquiry emails and course discussion forums, improving students' conceptual understanding of course materials.

PROJECT EXPERIENCE

AI's Undergraduate Mentorship Program

Let's SOLVE it Borealis

2022

- Used a dataset containing 500 redditors' posts with 5-label depression classification from subreddit r/depression to forecast depression level and risk of suicide through analyzing texts from a person.
- Employed **natural language processing** techniques, such as tokenization, stop word removal, lemmatization, and stemming, along with **Python** libraries like **NLTK** and **Scikit-learn**.
- Built and trained four **machine learning models**, outperformed existing published works in depression classification.

Software Developer - WeChat Mini-Program

Aranyaka WeChat Mini-Program

2021

- Developed a WeChat mini program platform that provides learning and life information for college students in North America; Successfully gained over 200 active users since its release.
- Implemented features such as post categorization, menu bar, and search functionality using **JavaScript**, **CSS**, and **HTML**; Utilized **MongoDB** as the database for storing and managing application data.

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, C/C++, SQL, PHP, HTML/CSS, MATLAB, R

Frameworks: React, Node.js, Express.js, Bootstrap, Tailwind, TensorFlow, Scikit-learn

Tools and Platforms: Microsoft Azure, Power Automate, MySQL, MongoDB, Git, Postman
